PROFILE

Passionate about artificial intelligence, from *deep learning*, *NLP* and *computer vision* to LLMs and agentic systems, keeping up with the evolution of the field. In my spare time I contribute to **open-source** projects (e.g. openai-agents-python) and work on personal projects.

EDUCATION

Master's Degree in Artificial Intelligence 2021 - 2023
University of Bologna
Graduated with a final grade of **110/110 cum laude**.

Bachelor's Degree in Computer Science 2018 - 2021
University of Bologna
Graduated with a final grade of **108/110**.

WORK EXPERIENCE

AI Engineer 12/2023 - Present | Faenza
Diennea

- Developed **agent**-based solutions to query the company's knowledge base and customer data. Built an **MCP server** for data access and management, also exposing these capabilities to external tools (e.g. ChatGPT, Claude).
- Designed and deployed to production a **FastAPI** server that centralizes AI model requests from platform integrations and newly developed features, handling their routing and responses.
- Developed an internal **Python package** to integrate LLM services from multiple providers, image and audio generation services, and custom machine learning algorithms.
- Built a scalable and *memory-efficient* **collaborative filtering** system for product recommendations based on users' purchase history.
- Designed **LLM-based** solutions to extend the functionality of existing software (e.g. assistants, automatic analysis, task automation).

Data Scientist Intern 04/2023 - 08/2023 | Bologna
Data Reply

- Developed my **thesis project**, focused on processing heterogeneous custom data (textual and tabular) to make it usable by LLMs.
- Ran **fine-tuning** experiments and compared their effectiveness against a **Retrieval Augmented Generation** approach, for both OpenAI and open-source models.

COMPUTER SKILLS

- Used **Python**, JavaScript, C++, SQL and R in academic courses, personal projects and professional roles.
- Used libraries such as NumPy, pandas, TensorFlow, Keras, PyTorch, scikit-learn, FastAPI and Streamlit to build data analysis, machine learning and deep learning solutions.

LANGUAGES

Italian (native) | English (professional working proficiency)
